

UNVEIL A NEW YOU

Lisa Claypole of ELYSIA SKIN:BODY:LASER salon in Tansor is at the forefront of advanced skincare treatments in the area, bridging the gap between beauty treatments and cosmetic surgery.

Established by aesthetician Lisa Claypole some 18 years ago in the beautiful village of Tansor, ELYSIA SKIN:BODY:LASER is the go-to for advanced face, body and laser treatments. When we meet, it's clear that Lisa is dedicated to helping her clients make positive changes to their skin and body shape. She doesn't promise miracles, but relies instead on tried and tested, evidence-based treatments which are delivered safely over a period of time. It is a winning formula which has seen her gain a trusted reputation in the area. Now, after rebranding, Lisa is set to take the business forward once again.

"My clients are driven by visible results and how they feel after treatment or a course of treatments, and I am too," explains Lisa. "I thoroughly research everything to make sure we are offering the best and most advanced technology."

The range of treatments are designed to work harder and provide more dramatic results than spa or salon treatments, bridging the gap between beauty and surgery. Lisa has dedicated the last 18 years to understanding skin and training for her practice. Her focus is always on how to improve problem skin, minimize the effects of ageing and to provide long term results, rather than a quick fix.

For optimum skin health, Lisa recommends Environ which was developed by a South African dermatologist, and Zo Skin Health and Medical by Dr Obagi – both are Retinol based, prescription strength, and they can help with treating anti-ageing, rosacea, pigmentation, acne and sun damage. For a non-surgical facelift, CACI treatments are always popular and are suitable for maintaining healthy skin. An award

winning, non-surgical face lift, Lisa describes the process as "like a gym session for your face and neck." A course of treatments is recommended, and Lisa can combine this with other procedures, to create a bespoke package.

Lipofirm Pro and Exilis Elite (featured in Tatler magazine's Cosmetic Surgery Guide 2018 as a go-to treatment) both harness the power of ultrasound and radio frequency to offer different levels of skin tightening, contouring and cellulite-busting and are painless, so clients can continue with day to day life as soon as they leave. The one-hour Lipofirm Radio Frequency skin tightening treatment focuses on body and face, boosting collagen production and making the skin glow.

When it comes to having a treatment that keeps skin looking fresh, Lisa recommends a peel. It may sound daunting, and you might think that you'd have to hide away for weeks afterwards, but with a thorough consultation, this is definitely not the case.

Venus Viva treatments reduce wrinkles, improve skin texture and lessen the appearance of scarring using focused radio frequency and needling technology. In addition to these specialist treatments, Lisa has a registered Nurse Prescriber who can deliver muscle relaxing injections, fillers and mesotherapy (injections of anti-oxidants and vitamins). Medical laser treatments are also offered for hair removal, red thread veins, pigmentation, acne and symptoms of rosacea.

"I thoroughly research everything to make sure we are offering the best and most advanced technology"

Those who visit Elysia recommend the salon for the high level of care given, sound knowledge and experience, the sense of calm, the beautiful, discreet location and unhurried approach. There is always more than enough time to address any concerns you may have prior to, or after, your treatment. The team are all there for you – and once you've visited, you may well be asking yourself why you didn't do it sooner.
